OBJECTIVE

Innovative and passionate AI & ML Engineer with a strong foundation in Generative AI, NLP, Computer Vision, and Intelligent Automation. Skilled in building LLM-powered applications using LangChain, TensorFlow, and Keras, with hands-on experience integrating AI into real-world business solutions. Eager to contribute to cutting-edge AI projects that combine creativity, scalability, and automation to transform ideas into intelligent products.

EDUCATION

- **BTech in Artificial Intelligence & Machine Learning (Pursuing – All Clear)**
  DPG Institute of Technology and Management, Gurugram
  Expected Graduation: 2027

- Class XII (CBSE) | 72%
- Class X (CBSE) | 86%

EXPERIENCE

AI/ML Engineer, Nexyug Tech | Jan – Oct 2025
Lead tech team, designed workflows, managed reports, built and deployed AI/ML models driving innovative solutions.

Zoho Developer, Business Raisers | Sep – Oct 2024
Built low-code apps, customized CRM & Creator, and automated workflows using Deluge.

SKILLS   Certificates / Offer Letters

- **Programming Languages:** Python, C, C++, JavaScript, HTML, CSS

- **AI/ML:** TensorFlow, Keras, Scikit-learn, Transformers, Hugging Face, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, RNNs, CNNs, Attention Models, Tokenization, Text Classification, Sentiment Analysis, Machine learning, Data analysis, Artificial intelligence, LLM Model, NLP, GPT2,

- **Web Development & Tools:** FastAPI, Flask, Firebase, Deluge, REST APIs, Google Colab, Jupyter Notebook, VS Code, IDX (Google), Git, GitHub, Zoho Creator, Zoho CRM

- **Cloud & Deployment:** AWS, Google Cloud Platform (GCP), Microsoft Azure

- **Soft Skills:** Project management, Problem solving, Team leadership, Business development, Start-up operations

- **Other Technical:** .pkl files, Model Serialization (Pickle & Joblib), API & Firebase Integration, Software development, OpenAI APIs

PROJECTS

- **Import Medicine (Generative AI):** AI-powered medicine inventory system automating Excel uploads, validating batch data, and enriching records using LLMs. (Github)

- **Symptoms to Medicine (Healthcare GenAI):** Intelligent web app that interprets symptoms and recommends medicines using semantic search and LLMs. (Github)

- **AI Resume Analyzer (Generative AI):** Smart resume analyzer extracting key insights and storing structured data using Google Generative AI. (Video)

- **Deva Voice Chatbot (Generative AI):** Voice-enabled chatbot with gender-based personas, speech control, and real-time conversation memory. (LIVE)

- **HaritAI (Generative AI for Sustainability):** Eco-innovation AI that classifies waste images and generates sustainable product ideas and visuals. (LIVE)

- **AI Agent System (LLM + VectorDB):** Multi-agent AI system powered by LLMs, integrated with vector databases and orchestrated using LangChain/AutoGen. (COLLAB)

- **AI Interviewer:** AI-powered interviewer for Excel skill assessment with automated evaluation and leaderboard tracking. (LIVE)
